Nazdar Industrial Screen Inks

The vast number of substrates, shapes, materials, and applications used by modern industry represents a number of formidable challenges to today’s screen printer. One of the most crucial challenges is Productivity vs. Profitability – how do you maintain an ink inventory to meet all the requirements of so many applications and still make a profit?

Nazdar provides answers with the most versatile and dependable line of screen industrial inks spanning a range of solvent-based, water-based and UV-curing inks and pushing the technology envelope with LED curing inks. Each specifically formulated to provide superior, lasting results no matter the substrate. From injection molding to electronics, or form automotive to dinnerware, Nazdar has a screen ink that will deliver uncompromising results.

Applications
- Container
- Durable Decal
- Electronics
- In Mold Decorating
- Industrial Decoration
- Marking & Coding
- Metal Decorating
- Membrane Switch
- Nameplate
- Packaging
- Specialty Products
- Textile
- Vacuum Forming

Nazdar Narrow Web Inks

Nazdar has a wide range of Narrow Web Inks that offer both superior performance and the best product support in the industry. Our portfolio of inks include: UV Rotary Screen Inks, UV Flexo Inks, Water Base Flexo Inks, UV Flexo Overprint Varnishes, and UV Offset Inks.

Nazdar Industrial Digital Inkjet Inks

Nazdar has specialized in the design and manufacture of quality inkjet products into a wide range of industrial market sectors for many years. Nazdar products have been at the forefront of a host of inkjet applications. From pipe extrusion to product decoration to functional fluids.

Paramount to Nazdar’s strength in these areas is the wide range of Inkjet technology offered to our partners. Rather than try and make a technology fit the application, Nazdar firmly believes that offering the right base technology is key to success. We pride ourselves on working closely with hardware manufacturers and inkjet integrators to develop customized high-performance solutions to meet their application requirements.

If you have a requirement for customized inkjet inks see how Nazdar can exceed your expectations and be part of your integration team!

Nazdar industrial ink technologies:
- Solvent Drop on Demand
- Solvent Continuous Inkjet (CIJ)
- Conventional UV Curable
- LED UV Curable
- Water Based Resin Ink
- Water Based Dye and Pigmented Inks

Our Mission

Nazdar’s mission is superior service for our customers. Our objective is to go beyond just filling an order: we’re here to provide solutions that help our customers improve their products and processes.

Fulfilling that mission requires a commitment to innovation that involves every area of our operations and our corporate behavior. It means we continue to invest in our strengths; our employees, quality, distribution, R&D, and our business partnerships. We believe that these strengths, together with the consistent practice of our Five Operating Principles, will ensure our success in serving our customers.
