**A Global Reach and Global Stewardship**

With two manufacturing facilities and multiple distribution centers across the globe, Nazdar has the ability to deliver your OEM labeled product where and when you need it. Nazdar also makes global stewardship an important factor in bringing new products to market. We work with low-migration and water-based ingredients whenever possible and take sustainability into account when developing packaging.

**Unmatched Quality and Consistency**

Nazdar’s quality and production processes are ISO 9001:2015 certified and are implementing the revised 9001:2015 specifications. Our inks are manufactured and QC tested to the tightest tolerances in order to ensure batch-to-batch consistency and quality.

If you have a requirement for customized inkjet inks, see how Nazdar can exceed your expectations and be part of your integration team!

**Nazdar industrial Inks**

**UV and UV/LED Curable Inks**
- Single Pass
  - Roll Label
  - Packaging
  - Low Migration
- Multi Pass
  - Industrial
  - Graphic
- Direct to Shape
  - D2S for Glass
  - D2S for Plastics

**Solvent Inks**
- Coding & Marking
- Crop on Demand

**Water Based Inks**
- Water Based Resin
- Deco Laminate
- Inkjet Textile

**Formulations**
- Solvent
- Water Based
- UV Curable
- LED Curable
- Dye Sublimation
- Pigmented Inks
