*Adding RA1500 lowers weathering at RA1000  
**Adding RA2500 lowers weathering at 2000  
***Dried film thickness of 10 microns (rating of clear only)
In need of a protective coating to maximize durability and abrasion resistance? Nazdar Roller Coat Clears.

Roller Coat Clear is a UV curable protective coating to maximize the durability and abrasion resistance of screen and some digitally printed graphics.

**Nazkote RA1000 UV**

**Premium Gloss RC Clear**

**Nazkote RA1500 UV**

**Premium Satin RC Clear**

RA1000 Premium Gloss RC Clear is a UV curable protective coating to maintain the flexibility and abrasion resistance of screen printed graphics. This product shows excellent clarity and flow-out properties. The primary features of this product are:

- Maximum exterior performance with resistance to the effects of UV degradation and color fading.
- Excellent “flexibility” for decal graphics over curved or irregular surfaces.

For a custom finish, the RA1000 and RA1500 can be mixed.

- Enhanced gasoline resistance

**Substrates:**

- Premium pressure sensitive vinyl
- Flexible vinyl

**Nazkote RA2000 UV**

**POP Gloss RC Clear**

**Nazkote RA2500 UV**

**POP Satin RC Clear**

RA2000 and RA2500 POP Roller Coat Clear is a UV curable protective coating to enhance the finish and abrasion resistance of screen printed graphics. This product shows excellent clarity and flow-out properties. The primary features of this product are:

- Enhanced exterior performance with resistance to the effects of UV degradation and color fading.
- Fast curing characteristics minimize the risk of “blocking”.

For a custom finish, the RA2000 and RA2500 can be mixed.

**Substrates:**

- Coated card stock
- Pressure sensitive vinyl
- Coated paper
- Some plastics

**Nazkote RA3000 UV**

**Gloss RC Clear**

RA3000 Liquid Lamination Clear is a UV curable protective coating to enhance the abrasion resistance of screen printed graphics. This product shows excellent clarity and flow-out properties. The primary features of this product are as follows:

- Designed for indoor and short term outdoor durable decal applications.
- Excellent adhesion on most self-supporting flexible vinyls and pressure sensitive vinyls including decal graphics applied over flat smooth surfaces (non-fleet applications).
- Fast curing characteristics minimize the risk of “blocking”.

**Substrates:**

- Premium pressure sensitive vinyl
- Flexible vinyl
