

# 565 Series

## Wide Format Solvent Inks

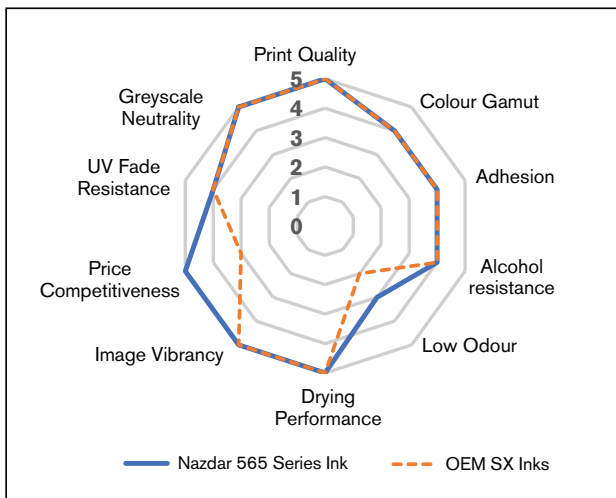

**NAZDAR**  
INK TECHNOLOGIES

### for use in Oki™ Colorpainter M64-S Digital Printers using Oki SX IP6 inks.

Nazdar® 565 Series Digital Imaging Inks are designed specifically for use in Oki™ Colorpainter M64-S Digital Printers using the Oki™ SX IP6 6 or 7 colour inkset. 565 Series Plug-n-Play capabilities allow users of Oki™ M64-S printers running with SX IP6 inks to change to Nazdar 565 Series ink without the need to flush.

Due to the complete chemical and colour compatibility of the two ink sets, OEM pouches can be replaced with Nazdar 565 Series pouches as they run out, rather than all colours at the initial install. This saves both time and money as there is no need to perform wasteful ink fill procedures or dispose of unused ink.

Solvent

0 = Low / 5 = High

Ink testing done by Nazdar

**Benefits:**

- Excellent Outdoor Durability
- Vibrant, high quality Output
- Wide Colour Gamut
- Low Odour
- Stronger Adhesion
- Lower Cost
