

# 730 Series

## UV Inks

**NAZDAR**  
INK TECHNOLOGIES

## Our most versatile ink, for high speed, high volume industrial and graphic printers.

Nazdar® 730 Series ink primary uses are for POP displays, durable graphics and banners where color fidelity and adhesion are of primary importance.

The primary features of these inks are as follows:

- Formulated for use in multiple applications with adhesion to a wide variety of flexible and rigid substrates.
- Excellent resistance to edge chipping on rigid substrates when used with a knife or router cutter
- Long term exterior performance with proven resistance to the effects of UV degradation and color fade.
- High impact, high intensity colors with extended color gamut
- Consistent color density values
- Heat bendable
- Block resistant

### Substrates

Acrylics, Lexan, reinforced vinyl banner, pressure sensitive vinyl, window cling, styrene, Sintra, rigid polyethylene, fluted polypropylene, foam board, polycarbonate, Teslin® synthetic paper and Dibond®.
