

# 749 Series

## UV Inks

**NAZDAR**  
INK TECHNOLOGIES

## General purpose graphic ink for UV printers

Nazdar® 749 Series Digital Imaging Inks are designed for use in the most common UV digital printers.

Primary uses of this product are for POP displays, durable graphics and billboard banners where flexibility is of primary importance. Typical substrates are vinyl banner, pressure sensitive vinyl, styrene, polycarbonate, fluted polypropylene, and foamboard.

The primary features of these inks are as follows:

- Formulated for use in rigid and flexible applications
- Excellent resistance to edge chipping on styrene, foamboard and fluted polypropylene materials when used with a knife or router cutter.
- Long term exterior performance with proven resistance to the effects of UV degradation and color fade.
- High impact, high intensity colors with extended color gamut
- Consistent color density values
- Adhesion on a variety of flexible and rigid substrates

### Substrates

Reinforced vinyl banner and pressure sensitive vinyl. Styrene, fluted polypropylene, foam board and polycarbonate. Adhesion should always be tested as adhesion does depend upon curing conditions, age and manufacturer of substrate. Adhesion may be improved when the substrate is cleaned with a suitable solvent such as isopropanol.

### Packaging

Flush Solutions are available in 1 and 5 liter containers and Cleaning Solutions in 5 liter containers.

Item No.	Colors
LWU749CL	Lt Cyan
LWU749CY	Cyan
LWU749ML	Lt Magenta
LWU749MA	Magenta
LWU749KK	Black
LWU749YE	Yellow

Item No.	Colors
LWU749WH	White

Item No.	Clean Up
LWU791FF	UV Maintenance Solution
