

204 Series Inkjet Ink

Nazdar® 204 Series Digital Imaging Inks are designed specifically for use in Roland™ TrueVis Digital Printers using TR Inks.

The Nazdar 204 Series inks offer a closely color-matched and chemically-compatible alternative for Roland™ TrueVIS SG and VG Series printers using TrueVIS TR inks. With plug-and-play capabilities and consistent high-speed printing performance, users can simply replace the OEM ink as it runs out with the 204 Series ink, producing high-impact, high-intensity colors comparable to the original inkset.

The low-odor Nazdar inks have been formulated to the same regulatory classification as the OEM inks, making them suitable for use in environments without the need for specialized ventilation. Available in CMYK plus Light Cyan, Light Magenta and Light Black, the Nazdar 204 Series ink range is ideal for commonly used graphics substrates including banner material, flexible and pressure-sensitive vinyl, blue back paper and backed mesh, and delivers consistent and reliable print performance, even at high-speed print modes.

0 = Low / 5 = High

Ink testing done by Nazdar

Benefits

- Formulated to meet the regulatory targets achieved by Roland™ TR inks
- Low odor formulation
- Color matched to Roland™ TR inks, avoiding the need for custom profiles in most situations
- High print-speed capability
- High-impact, high-intensity colors equivalent to the original OEM ink set
- Consistent and reliable print performance
