

706 V2 Series

UV-LED Inks

Mimaki® Roll-to-Roll and Flatbed Series Printers

Nazdar 706 V2 Series inks have been designed as a direct replacement of the Mimaki® LUS120 Series inks series. The hybrid set is used in the roll-to-roll and flatbed series machines. The 706 V2 Series inks are compatible with the OEM product and can be replaced one color at a time as the OEM inks run out. The 706 Series has a comparable substrate range to the OEM inks. The V2 inks offer a SVHC Free formulations with improved water resistance and closer color match to the OEM inks.

Primary features are as follows:

- Chemically compatible with the OEM inks for true plug-and-play
- Close color match to the OEM ink set
- Highly flexible
- Long term exterior performance with proven resistance to the effects of UV degradation and color fade.
- 1L container threading designed for Mimaki® Cap B
- Compatible chip for LUS120 series
- SVHC Free
- Enhanced Water-Resistance

Substrates

Compatible with a wide range of self supporting flexible and pressure sensitive vinyl, banner, window cling, polyester film, coated papers, backlit fabrics, polystyrene, Dibond®, expanded PVC, polycarbonate, foamboard

Adhesion should always be tested as adhesion does depend upon curing conditions, age and manufacturer of substrate.

Packaging

Colors available in 1 liter bottles.

1 Liter Bottles

Item No.	Colors
LWU706V2CY1L	Cyan
LWU706V2MA1L	Magenta
LWU706V2YE1L	Yellow
LWU706V2KK1L	Black
LWU706V2KK1CL	Light Cyan
LWU706V2KK1ML	Light Magenta
LWU706V2WH1L	White
LWU706V2NCCHP	*Clear (Chip Only)

** Nazdar does not manufacture a clear ink option currently. We do offer the chip to complete the ink set.*
